From: D. Beavis

Subject: Ga Metal Target (tgt_16_029(a))

I have approved the exposure of a Ga metal target which is the “same” as the target that failed earlier this year. This target has been newly prepared and is an effort to understand the issues with Ga metal targets. Please see the memo by C. Cutler.

There are no identified issues related to personnel safety or environmental safety.

There are no identified negative impacts on the isotope program.
