

BLIP Target Approval Form

Safety Submission Reference: Tgt_16_09 Irradiation of As target for Se-72
Production at 50 MeV on Target

Date of RSC Blip Target Subgroup Review: Via e-mail

Approved on: July 27, 2016

The Ga target which is located behind the As target may fail if the beam current is operated to 165 micro-amperes as noted in the approval for that target [tgt_16_02(b)]
