

Memo

date: January 13, 2010
to: J. Reich
from: D. Beavis 
subject: Access Control System Testing

Please provide a list of areas and the resources required to conduct the functional tests of the interlock system. Please include issues that impact the amount of time and effort to complete the tests such as contractor activity during shutdowns while testing is underway. The information you provide will be used by the RSC to advise the Department on ways to improve the systems in the future.
