

# STAR STATUS

TIME MEETING, 03/19/13

LEN K. EUN, LBNL

# CURRENT STATUS

---

Timing issues that we had in the first week of physics running have been resolved.

Most of the triggers have been elevated to physics since 03/17 (Sunday). Production runs have begun.

Di-jet trigger ( $\Delta G$ ) not implemented yet (firmware expected soon).

FMS (Forward Meson Spectrometer) still getting commissioned

# SAMPLED LUMINOSITY PROJECTION

After ~a week delay, we are taking physics data now.  
BHT3 is the base trigger for the W program.
