B1004E Compressor Building is Now C-AD's Only ODH-1 Posted Building

- You need ODH-1 training and current ODH -1 physical to enter
- You must wear a calibrated Portable Oxygen Monitor (POM) to enter the building
- You must first open the door and hold the POM at arm's length at the building door to verify that the oxygen concentration in the building is safe
- You DO NOT need an escape pack to enter, only the POM - it takes no more than ~15 seconds to exit the building (it is small) if your POM alarms
- There are always 2 escape packs in the building mounted and labelled on the wall for use if needed
- The building is keyed with a lock and only Cryo has the key
 - This will help ensure that all non-cryo entrants are fully familiar with the entry requirements and with the ODH hazards in this new building

CAUTION

**OXYGEN
DEFICIENCY
HAZARD**

1

PRIOR TO ENTRY, ALL PERSONNEL
MUST HAVE:

- CA ACCESS or COLLIDER USER TRAINING
- EMERGENCY ESCAPES PACKS LOCATED INSIDE BUILDING
- PERSONAL OXYGEN MONITOR (POM)

CAUTION

POSSIBLE ODH HAZARD

STOP!!!

Portable oxygen monitors (POM)
must be held at open door for 15
seconds prior to entry to test indoor
atmosphere

CONTACT: MCR X4662 IF POM ALARMS

NOTICE

THE LOCKS WILL BE CHANGED AND
KEYED FOR CRYO GROUP ACCESS
ONLY. PLEASE CONTACT THE CRYO
GROUP FOR ESCORT UNTIL THAT
TIME AT

X3837 OR 7595 CRYO CONTROLS

Snow Clearing

- We give BNL a plan for snow removal priorities at the C-A complex, which they will follow but unexpected problems occur
- Please call MCR (4662) if you need an area cleaned of snow for machine or experiment access
- You may spread ice melt for your own safety if you can't wait for the custodians or none are available to help

Expect the Unexpected
