

PHENIX Run-14 Status

Klaus Dehmelt
February 11, 2014

Muon Arm South Water Leak

- Water supplies on
- Magnet operated at full power
- Shift crews checked regularly for leaks
- No leak found
- Intermittent issue, might have been caused by “dry” or non-properly seated o-rings

Calendar and Plans

- Beam development and setup for Au-Au collisions at $\sqrt{s} = 14.6$ GeV to be finished by Feb. 15
- First collisions in PHENIX expected by Feb. 15
- Start of Physics Runs
- PHENIX on full shifts since Feb. 04, detectors being commissioned
- Agreed on short access on Wed Feb. 19
- Take any opportunistic access
 - Check background counters
 - Check FVTX
