

Commissioning Goals for 2014

Coherent Electron Cooling Injector

Commissioning goals

- Reach 2 MV accelerating voltage on the 112 MHz SRF gun
- Commission two 500 MHz normal conducting bunching cavities
- Commission cathode launcher system
- Commission drive laser and extract 1-2 nC of charge per pulse
- Commission low energy diagnostics
- Experiment with diamond amplifier

Other

- Find compatible mode of operation of CeC and pA experiment
