

# PHENIX Run-14 Status

Klaus Dehmelt  
March 18, 2014  
Time Meeting

# PHENIX High Energy Run

- Received first collisions last Friday
  - 28 x 28 bunches
  - Timing-in of detectors
- First physics collisions on Saturday
  - 111 x 111 bunches
- Setting up detectors, taking data
- Frequent trips of power supplies for central magnet

# Calendar and Plans

- PHENIX is taking data
- Repair/replacement work started for magnet's water supply system
- Maintenance day on Wednesday, Mar-19
  - Controlled access
  - No major work planned in IR
  - Replacement of water hoses and flow switches
