

RHIC Status

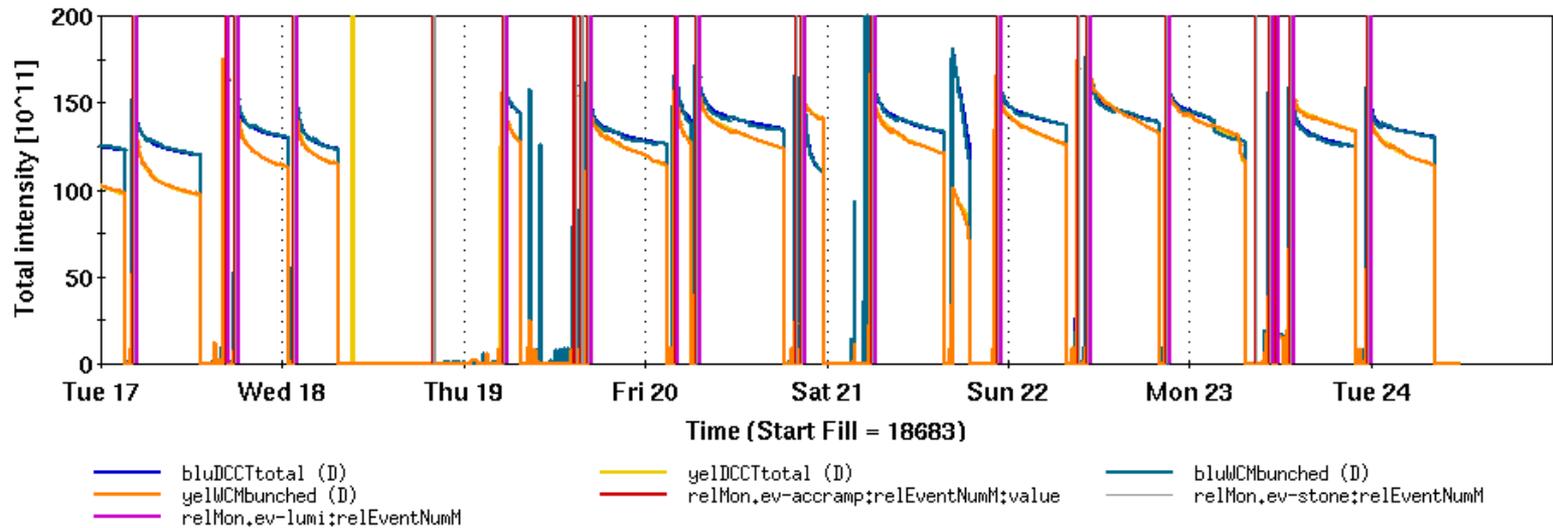

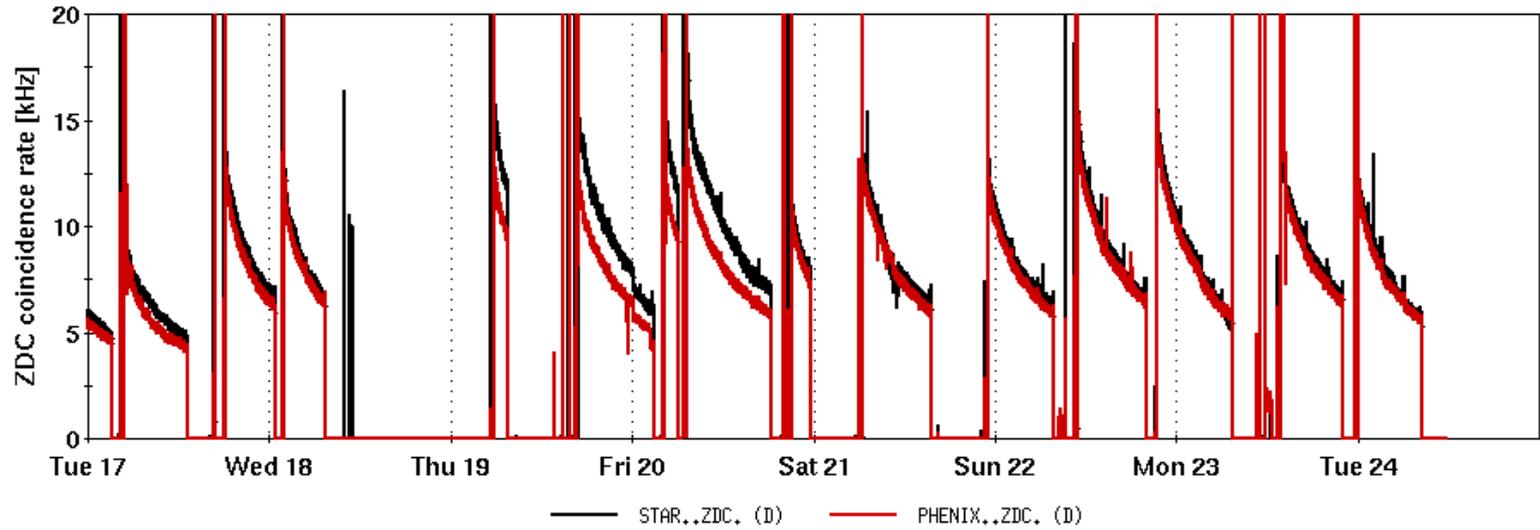

Time Meeting
2/24/2015

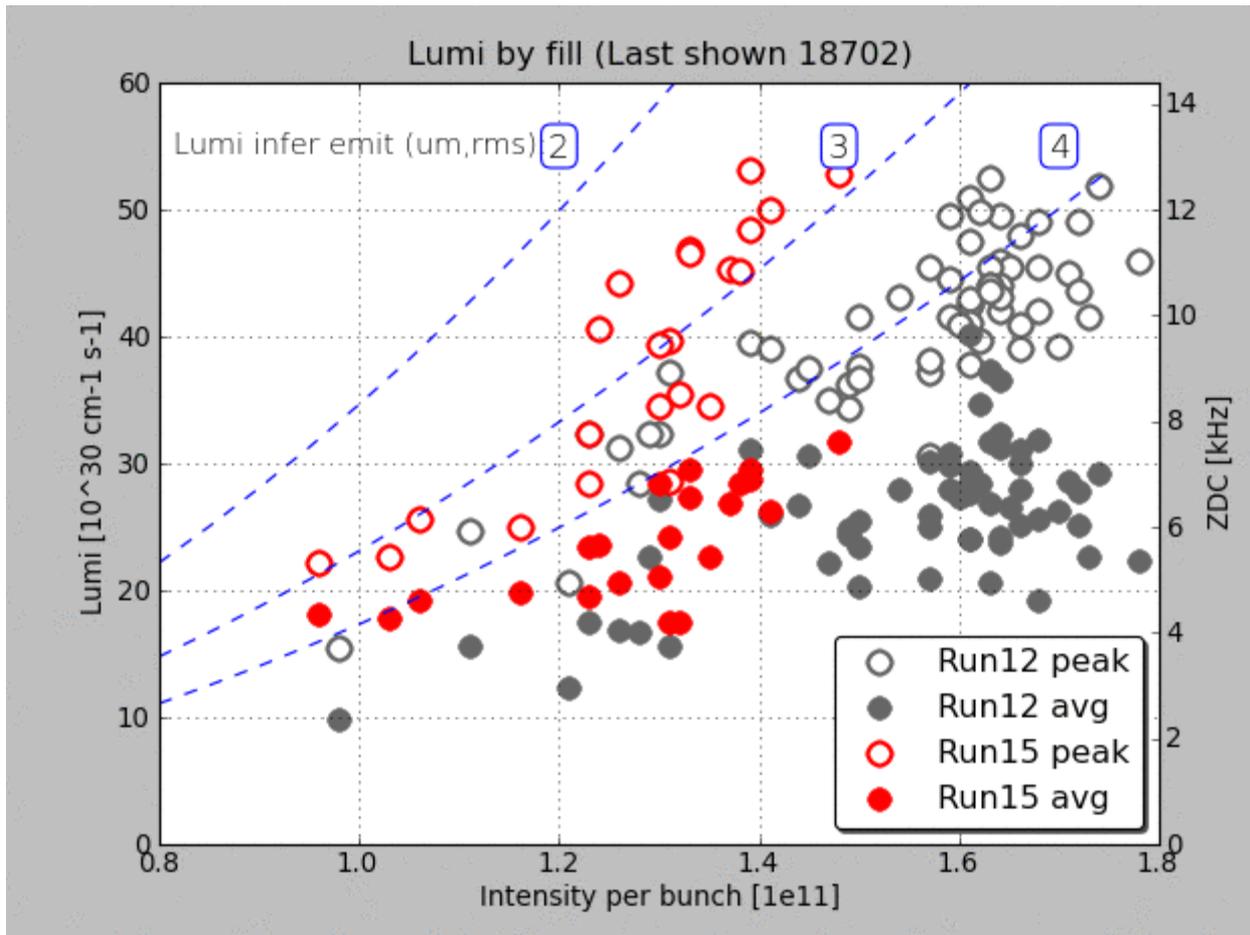

And through the drifts the snowy clifts
Did send a dismal sheen:
Nor shapes of men nor beasts we ken—
The ice was all between.

RHIC Status/To Do List

- Delivering regular physics stores
- Peak lumi now equal to Run12 (at lower intensity)
- Yellow e-lens running for stores now
 - Low current (100 mA now, 500 mA compensates $1.6e11$)
- Blue e-lens bakeout ends today. Cathode conditioning necessary before blue e-beam
- Carbon polarimeters ~60%

RHIC Run15 p⁺p⁺ Delivered Luminosity ($\sqrt{s} = 200$ GeV)
