

Linac Status

D. Raparia

March 31, 2015

Time Meeting

Status

- Linac running in good condition for polarized proton and BLIP.
- BLIP energy was changed back to 117 MeV from 200 MeV on 3/30.
- BLIP average current is reduced to 90 μA for this batch of targets.

- Maintenance

04/01/2015: 8 HRS, OPPIS, ionizer change

04/06/2014: 4 HRS (aligned with BLIP target change)

Tube 7651 for mod 5,

Interchange PS for Sol#1 and LEBT BM1

Grid current PS for modulator in Mod 9

Doors in Mod #5 and# 6

Etc.

Average current for BLIP
