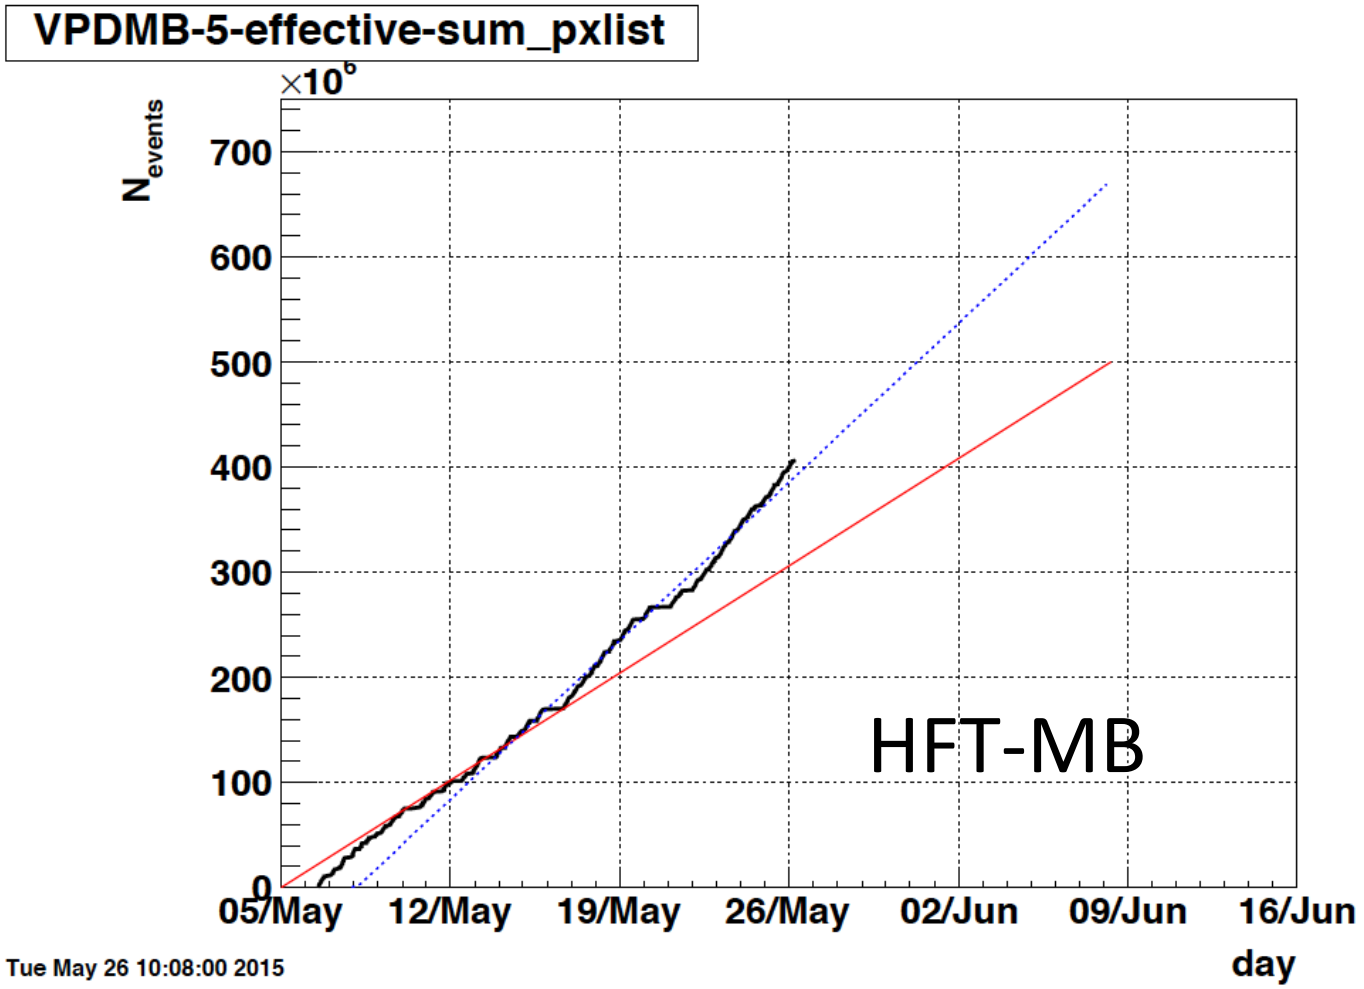
STAR status report in p+Au collisions

Hua Pei

Central China Normal University

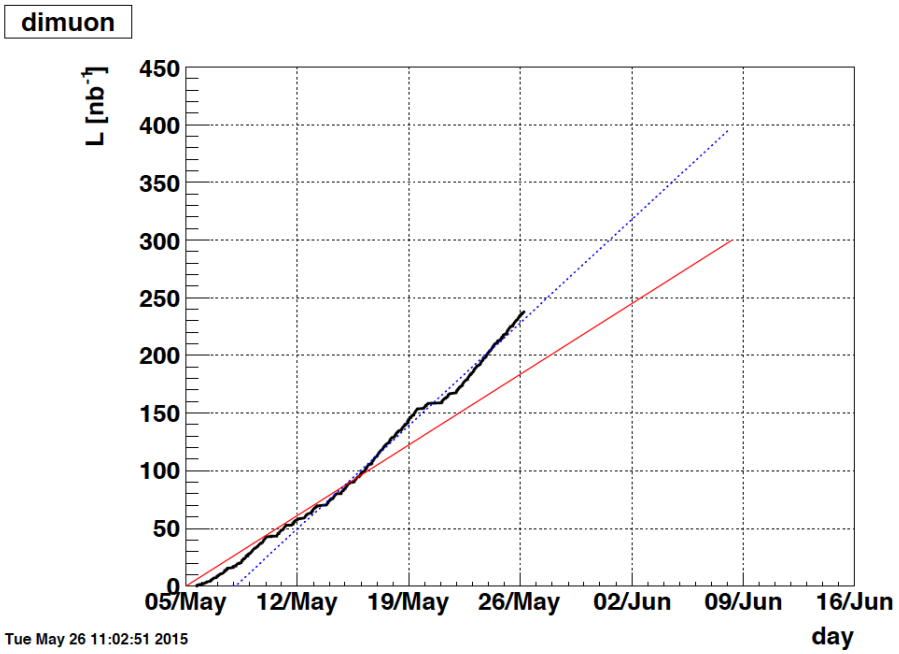
Time meeting May 26, 2015

Min-bias goal in p+Au

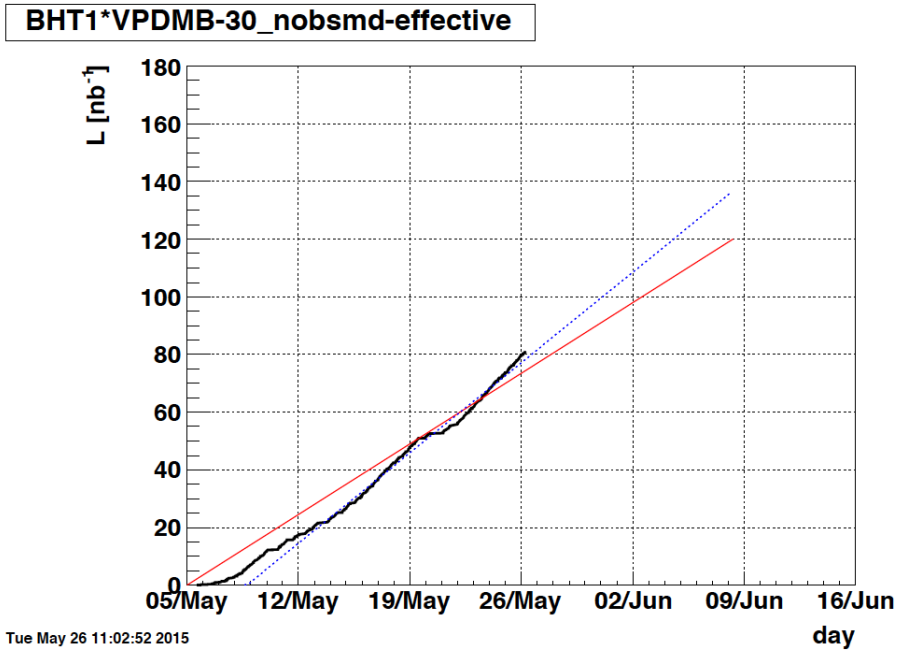


HFT min-bias goal reaches ~80%

Luminosity goal in p+Au



Di-muon



HFT high-p_T

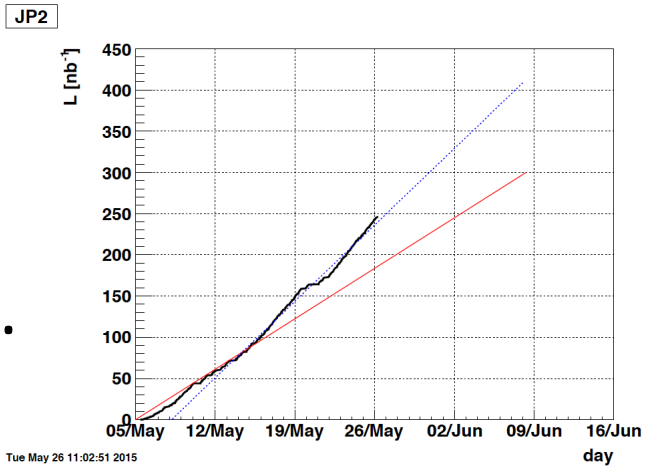
Di-muon goal reaches ~80%

HFT high-pT goal reaches ~67%

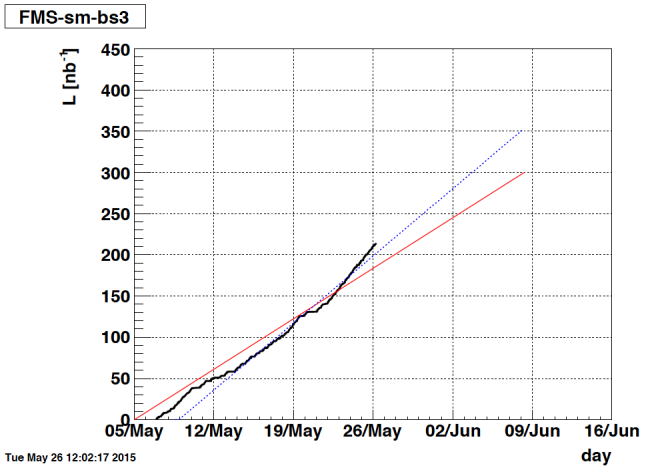
Polarization: Figures of merit goals in p+Au

Goal:
L=300 nb-1
P=60%.
P2 * L (FOM)=108.

Jets / High p_T

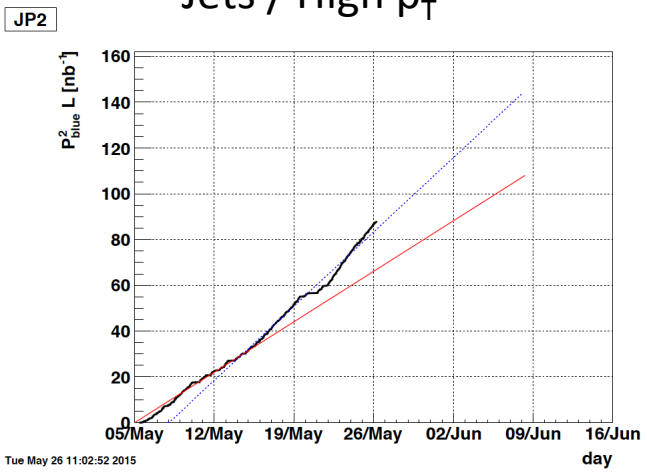


Forword π^0 / direct γ

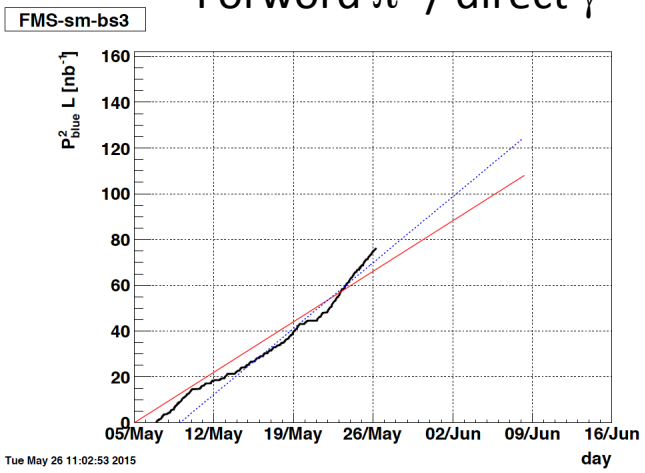


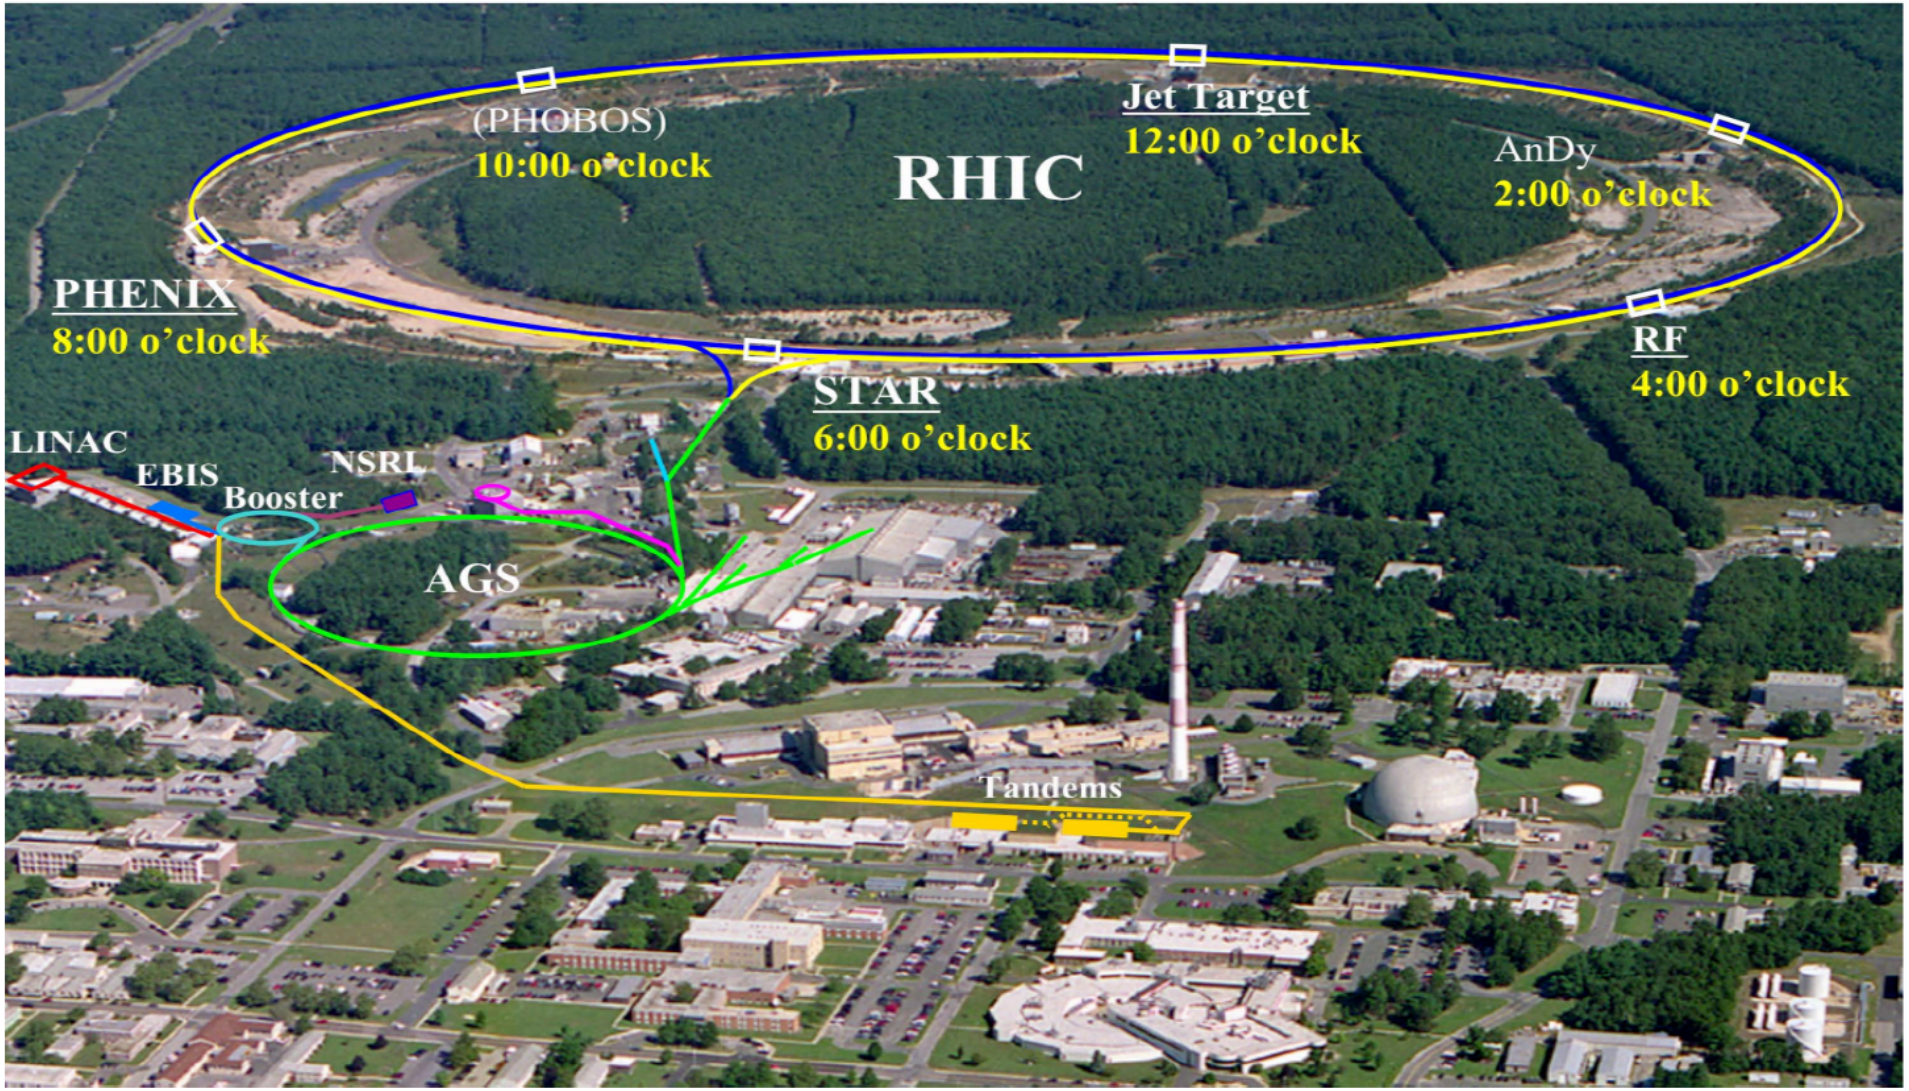
Pretty good progress since APEX last week

Jets / High p_T



Forword π^0 / direct γ





Thank you for providing such nice beam!
