

PHENIX Run-15 Status

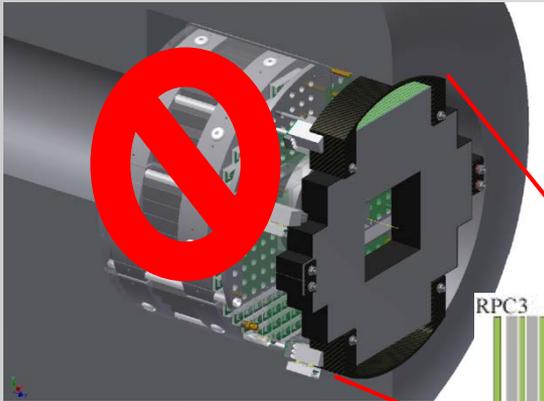

Douglas Fields

PHENIX Run-15 Run Coordinator

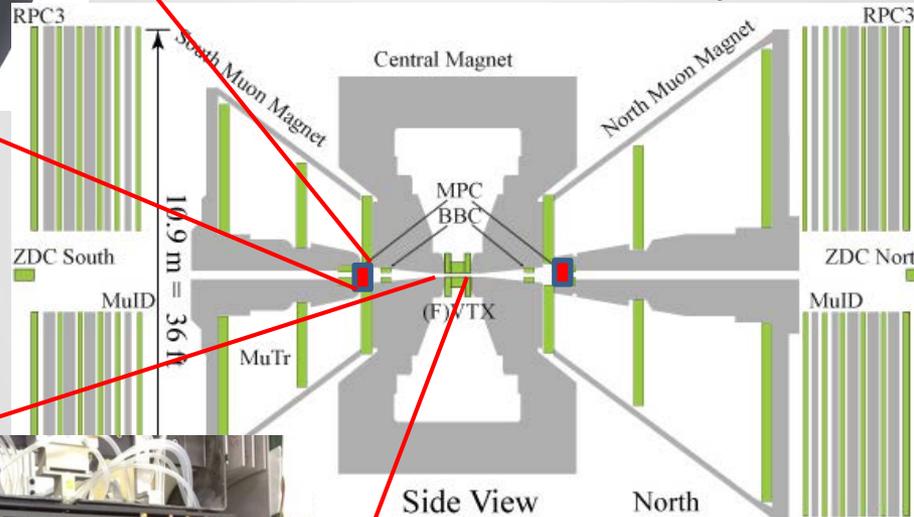

University of New Mexico

PHENIX Status

- MPC is out, but MPCEX is still alive
 - Can do charge particle tracking (e.g., for reaction plane determination)
 - Cannot do direct photon or neutral pions.

- VTX strips and pixels are out, but FVTX is in.
 - Cannot do DCA for heavy flavor, etc.
 - Can improve J/Psi resolution, get reaction plane, high mult. Trigger.

PHENIX Efficiency vs Day

Tue Jun 16 10:00:14 2015

Luminosity and FOM Progress

Summary

- We are taking good data with p+Al, minus some of our unique physics capabilities.
