

Schedule for NSRL Run 16A

5 January 2016

Michael Sivertz

Schedule

NSRL begins with a fixed target-like scattering cross section measurement for NASA-Langley. The choice of ions and energies currently looks like:

Date:	Ion	Energy
March 21	protons	400 & 750 MeV
March 28	He-4	400 MeV/n
March 30	Fe	400 MeV/n

Schedule

April 4: NASA radiobiology program begins, with a wide variety of ions.
Run 16A continues until May 13. In unreadable font...
