

CeC PoP Experiment

April 12, 2016

Project Progress

- The single cathode was found with zero QE during attempt to insert it into the cavity
- We started helium conditioning of 704 MHz accelerator
- We finished conditioning of the gun and 500 MHz buncher cavities.

What's Next

- Start preparation of two new cathodes
- Continue conditioning of 704 MHz cavity
- Calibrate BPMs in the common section during APEX
