BROOKHAVEN NATIONAL LABORATORY
MEMORANDUM

Date: July 10, 1998
To: Distribution
From: Roy Heyder
Subject: Minutes - ASSC PASS subcommittee June, 30 1998 re: 1002 gate procedure, key tree version 4

Members Present: A. Elkin, R. Frankel, R. Heyder, T. Robinson, S. Musolino, W. Mackay, P. Ingrassia, A. Mcgeary

Action Items

RHIC: a) 98-RC-12 was closed 6/26. There shall be a box with On/Off controls located on the CCW side of the vapor barrier at 12 o’clock.
b) 98-RC-14 was closed 6/30. The gate 3GS1 shall be taken out of the system software including the resetting of the gate. The state table shall take no notice of this gate.

AGS: None

Review of Gate procedure

1. It was noted that on page 3, 7 mode 8 should be referred to as RA not CA.
2. There was a long discussion on transiting gate 3GS1.
General Discussion

a) The gate procedure was reviewed with the comments made that there were mention in the test procedure of mode 8 being CA this shall be changed to RA.

b) There was a discussion on adding an ON/Off switch to control the fans at 12 o’clock on the CCW side of the vapor barrier. It was agreed that there should be such controls but was not clear if the controls could be added into the current plant engineering contract.
Approved: T. Robinson, ASSC PASS Subcommittee
