

- Minimum-bias Physics program started (May 20) : 330M as of today
- Continue to elevate other triggers - UPC, high- p_T triggers to Physics: Mostly done
- Finalize calibrations and detector commissioning: done
- TPC readout speed upgrade (to 5kHz) commissioning on-going (next 3 weeks)
- **Beam**
 - luminosity (to come), crossing-angle (works well), background (expected to be improved with cooling)
 - leveling at ZDC~10k for Min-bias program (will revisit as we optimize/upgrade DAQ readout)
